INDEPENDENT DEVELOPMENT PROJECTS

- **Personal Site:** Created a site for displaying my knowledge site building and design. I utilized Bootstrap along with jQuery to demonstrate my ability to use common tools for a look I desired. All of this is paired with some custom CSS elements I had created with media queries to show my ability to show my mobile first priority.
- **StoreFront:** Created a secure application for managing product data. Application is built to simulate an online store front with a shopping cart. Administrators have the ability to manage product, category and vendor data.
- **To Do Site:** Created a web application for keeping track of items. This was a practice project I used to learn how to create application with ReactJS. My site was created demonstrating my knowledge of React components and creation of an API with the accompanying API I created.
